PROFESSIONAL SUMMARY

Computer Science undergraduate with a strong foundation in Python backend development, AI-driven application development, and IoT systems. Passionate about creating innovative solutions at the intersection of software and hardware, ranging from AI-powered LegalTech platforms to embedded IoT devices. Dedicated to continuous learning through daily Data Structures and Algorithms (DSA) practice while actively sharing progress and insights with the developer community.

EDUCATION

Pranveer Singh Institute of Technology (PSIT), Kanpur, India	2024 – 2028
Bachelor of Technology (B.Tech) in Computer Science and Engineering	
Class XII Aggregate: 89%	2023 – 2024
Class X Aggregate: 88%	2021 – 2022

SKILLS

Programming Languages: Java, C, JavaScript

Web Development: HTML, CSS, Tailwind CSS

Databases: MongoDB

AI / ML: LLM Integration (Groq API, Llama-3.3-70b), Prompt Engineering

Tools: Git, GitHub,

CS Concepts: Data Structures and Algorithms, OOP, Operating Systems

PROJECTS

ZipForge: File Compression Utility	2024-25
- Developed a Java application to compress and decompress files using Huffman Coding for efficient storage. - Implemented binary tree-based encoding and decoding algorithms to reduce file size.	
Technologies Used: Java, File I/O, Data Structures	
QuizMaster: Online Quiz System	2025-26
- Built a quiz application with multiple-choice questions, score calculation, and result generation. - Implemented a timer-based quiz flow and performance tracking for users.	
Technologies Used: Java, Swing, JDBC, MySQL	
EduTrack: Student Management System	2026
- Built a desktop application to manage student records with CRUD operations and database integration. - Implemented secure data validation and search functionality for efficient record management	
Technologies Used: Java, JDBC, MySQL, Swing	

ACHIEVEMENTS / CERTIFICATIONS

- Built multiple Java-based applications, including a **Student Management System**, **Online Quiz System**, and **File Compression Utility**, demonstrating strong proficiency in Object-Oriented Programming (OOP), file handling, database connectivity, and algorithm implementation.
- Applied Java concepts such as exception handling, multithreading, collections, JDBC, and file I/O to develop efficient, scalable, and maintainable desktop applications.
- Solved Data Structures and Algorithms (DSA) problems regularly, strengthening problem-solving skills and improving proficiency in Java programming and algorithmic thinking.
